

GINKGOMED DIGITAL SLIDES

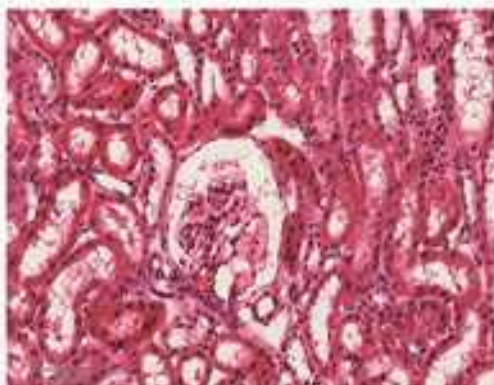

Ginkgomed Company is not the first one providing digital slides, but the only company that allows customers to hold the purchased digital slides for permanent usage.

We own a big collection of prepared slides containing sections from human tissues.

Our digital slides are created from this unique collection containing many unreproducible slides. For example, a set of

Digital Slides for Medical Histology contains 236 slides, 90% of them are digitized from prepared slides of the human tissue section. Those non-human slides are used for special staining and preparation which cannot applied on human tissue.

There are four kinds of digital slides available as follows:

Digital Slides for Medical Histology (DSMH) : 241 slides in 13 chapters.

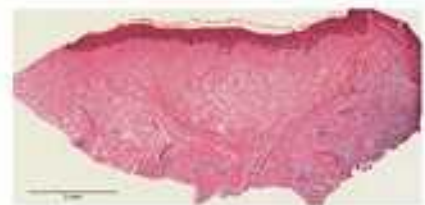

Digital Slides for Pathology (DSMP) : 655 slides in 17 chapters.

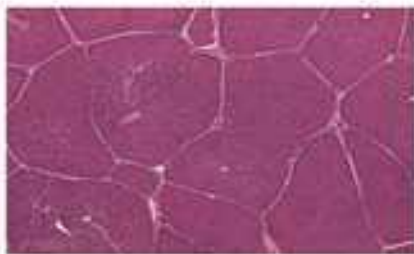

Digital Slides for Oral Histology and Oral Pathology (OHOP) :

128 slides in 2 parts.

Digital Slides for Animal Histology (DSMH) : 264 slides in 13 chapters.
